UPDATING THE SIDE VIEW IN YOUR BROWSER

After every change made to the website, please refresh the browser's page view on your computers. This is the only way to ensure that the latest version is displayed and not an older version is loaded from the cache.
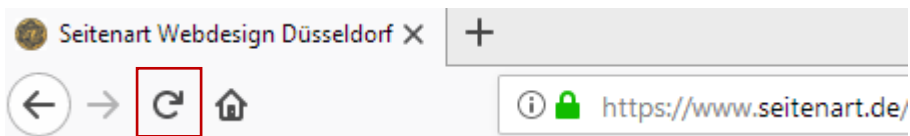

In general, the icon for updating the page view in the most popular browsers, such as Mozilla Firefox, Google Chrome, Internet Explorer and Safari are the same:

A circle opened to the right with an arrow ↻

This can be found in the listed browsers as follows:

MOZILLA FIREFOX:

Either before or at the end of the address line (depending on version)

GOOGLE CHROME:
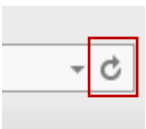

In front of the address line

INTERNET EXPLORER:

At the end of the address line

SAFARI:

At the end of the address line
